**PATENT**  
**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Inventor(s) : Colin G. Caro et al.  
 Title : HELICAL GRAFT  
 Serial No. : 10/549,498  
 Filed : August 14, 2006  
 Art Unit : 3738  
 Confirmation No. : 7739  
 Examining Attorney : Megan Yarnall Wolf  
 Last Office Action : March 8, 2011  
 Attorney Docket No. : DEHN 200008US01  
Cleveland, OH 44114

**STATEMENT OF SUBSTANCE OF INTERVIEW**

Commissioner for Patents  
 P.O. Box 1450  
 Alexandria, VA 22313-1450

Dear Sir:

An interview was held in connection with the above-identified patent application on March 2, 2011. During the interview, a flexible graft was demonstrated. Also, applicant argued that Cymbalisty is non-analogous art for several reasons.

Applicant's reasons included a) because Cymbalisty deals with rigid pipes, not the flexible conduits recited in the claims; b) because Cymbalisty deals with pipe

diameters greater than 10 inches rather than graft diameters of 5-10 millimeters; c) because Cymbalysty deals with straight/linear pipes, not curving ones as is shown in the instant application's drawings; d) because Cymbalysty is concerned with steady flows, not pulsating or pulsatile flows as occurs with blood; e) because Cymbalysty teaches a conduit that creates turbulent flow (see column 2, line 46; column 4, lines 9-11; and column 5, lines 37-38) but the non-planar geometry of the claimed invention inhibits flow instability and, hence, turbulent flow which is not desirable in any case in connection with blood flow; f) because Cymbalysty is designed to promote the flow of a fluid with a high concentration of solids (above 70 percent) which is not true of blood flow; and, g) because Cymbalysty teaches mixing transporting of abrasive materials which is irrelevant to blood transport. The Examiner maintained that Cymbalysty can be used for its teachings.

No agreement was reached.

Respectfully submitted,

FAY SHARPE LLP
